ACKNOWLEDGMENTS

THE JOHN A. HARTFORD FOUNDATION

We are indebted to The John A. Hartford Foundation for their unwavering commitment to “improving the quality and financing of health care and assisting the health care system to accommodate the nation’s aging population.” The innovative programs developed with their support will provide better health care for current and future generations of older adults.

Founded in 1929, The John A. Hartford Foundation is a committed champion of training, research, and service system innovations that promote the health and independence of America’s older adults. Through its grantmaking, the Foundation seeks to strengthen the nation’s capacity to provide effective, affordable care to this rapidly increasing older population by educating “aging-prepared” health professionals (physicians, nurses, social workers) and developing innovations that improve and better integrate health and supportive services. The Foundation was established by John A. Hartford. Mr. Hartford and his brother, George L. Hartford, both former chief executives of the Great Atlantic & Pacific Tea Company, left the bulk of their estates to the Foundation upon their deaths in the 1950s. Additional information about the Foundation and its programs is available at www.jhartfound.org.
